RAJINDER KUMAR MATHUR
Chairman
(Expodent International India)

It is our great pleasure that we on behalf of ADITI welcome you for **EXPODENT INTERNATIONAL INDIA - 2018** New Delhi. As in all the previous years, we bring you the latest developments in the field of Dentistry as regards Dental equipments, materials, consumables and systems, that reflect the global trends in this vast science.

To reiterate what we have been professing all along, it is our firm belief that constant updation in knowledge, this 'reinventing' of ourselves is what defines our standing in our chosen field of endeavour. Towards this, EXPODENT is our contribution, to be experienced and partaken of by all who are involved in the field of dentistry and allied sciences.

Please attend the **EXPODENT INTERNATIONAL INDIA - 2018** and experience for yourselves the current trends in this field. We look forward to meeting you soon.

Hall 9 Stall A10-A11

Ionofil® Plus

Glass ionomer restorative material

- Spreadable consistency
- Good marginal adaptation
- Very good wetting behaviour
- Continuous fluoride release
- Improved glass ionomer technology
- Good aesthetics in three shades

Ionolux®

Light-curing glass ionomer restorative material

- Excellent working time – setting time individually adjustable by light-curing
- No need for conditioning of dental hard tissue
- Also suitable for big cavities
- Immediately packable after placement in the cavity
- Does not stick to the instrument, easy to model
- Fill, polymerise and finish – no varnish required
- Fluoride release

Meron

Glass ionomer luting cement

- Luting of crowns, bridges, inlays, onlays, pins, posts and orthodontic bands
- Low solubility in the mouth
- Low acidity
- Biocompatible
- Easy application

Transparent Aligner

Easy & Comfort to wear

CARE ALIGNERS

CAREALIGN Orthodontic Aligners are the globally accepted alternatives today to conventional braces. They replace the cumbersome brackets and wires with a transparent, strong, thermoplastic material to guide teeth into their correct position. Especially in young patients who cannot tolerate pain and discomfort, discontinuation of treatment is commonly observed. The wires and wire ends used for movement may cut into the soft tissues, the elastic used to hold it position may also hurt, the cemented bracket may debond with usage or the patient may even sometimes forget to wear the unit.

The new Aligners that CARE has developed with an in house team of qualified dental professionals and technicians, along with sophisticated 3D resin printers completely avoids all the disadvantages of braces. CARE Orthodontic Aligners are characterized by smooth, slow and steady movement and complete degree of comfort in use. Complete process control right from design and development, taking patterns, manufacture, fitment and final adjustments are provided, thus making CARE ORTHODONTIC ALIGNERS the best in India today.
